The **Actilite**® dressing is coated with a combination of 100% Manuka honey and 1% Manuka oil, with the addition of the latter enhancing the antimicrobial effects. Best suited for granulating or epithelializing wounds, **Actilite**® offers antibacterial protection whilst promoting the ideal moist wound healing environment.

As well as maintaining the ideal moist wound healing environment, **Actilite**® also helps the wound to clean itself by creating an osmotic effect drawing moisture, as well as dirt and debris, away from the wound bed.
